[TX3]
Series
VOICE ENTRY

Features & Benefits

1. Audio video communication from visitors to occupants in all lighting conditions

   • Through its built-in camera with IR illumination, the TX3-NANO provides a positive visual identification of incoming visitors.

2. Versatile Door Station

   • The door station can retrofit to existing entrance locations and/or integrate with modern communication networks. It also supports PSTN and SIP communication protocols.

3. Durable, complementary exterior design

   • The TX3-NANO'S small surface mount housing attractively greets visitors with an illuminated scrolling name directory.

4. Built-in access control

   • Door control output is conveniently located on the station for easy installation.

5. TX3 Compatible

   • The station is fully compatible with the entire suite of TX3 products & services.
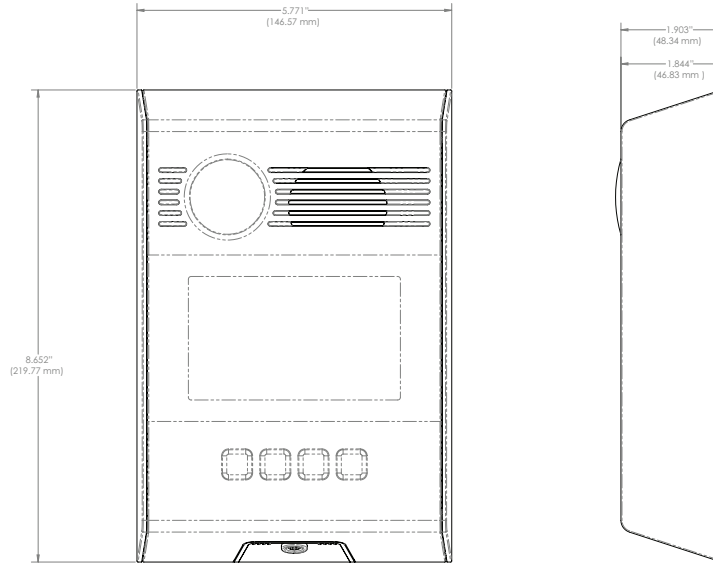

Description

As the newest addition to the TX3 family of products & services, the TX3-NANO provides a unified platform for all your communication and access control needs. The TX3-NANO leverages the IoT (internet of things) to maximize flexibility and minimize costs, while simultaneously providing the basic communication and access control capabilities necessary for a door station.

Fully equipped with a weather-resistant design, the TX3-NANO incorporates common communication protocols, from PSTN and SIP, to access control and communication between occupants and visitors. Convenient, versatile and reliable, the TX3-NANO meets and exceeds the needs of customers who demand mobility and modern aesthetics.
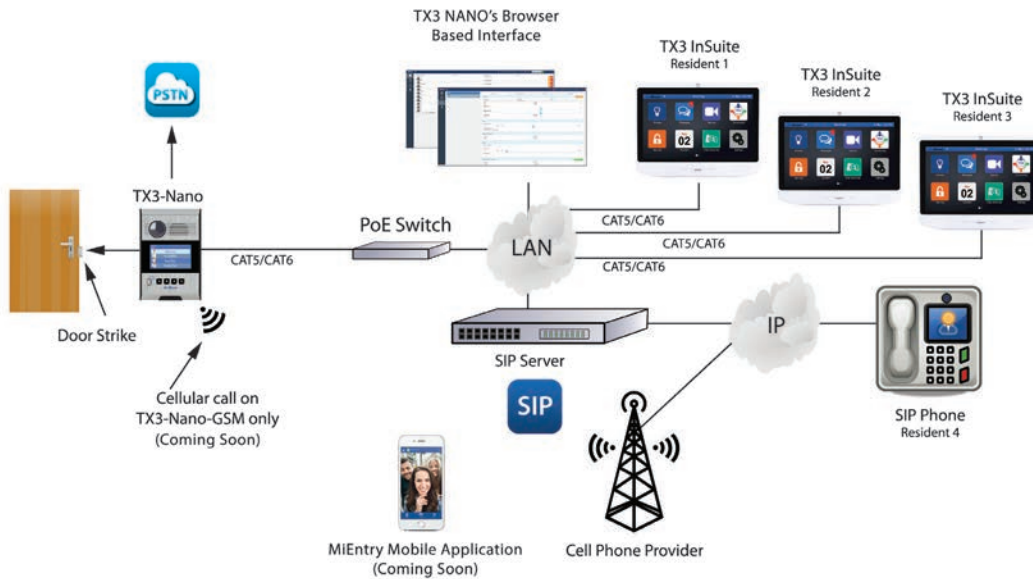

The TX3-NANO is a cost-effective solution, by using SIP (session initiated protocol) to consolidate all communication through a building's existing IP-network.
